Metrics scorecard
July 2020
**KEY METRICS**

### Thresholds To Enter Phase 2

**Infection Rate**
- Maximum social-distancing
- Sustained decline in daily cases for 21 consecutive days, as reflected in the 5-day rolling average
- < 10% positive of tests conducted (daily)
- Current estimate of <25 cases per 100,000 population per day
- All symptomatic people, all asymptomatic high-risk individuals or contacts can access testing
- Tests are readily available for all essential personnel
- Majority of test results are returned within 48 hours
- Increasing number of tests per day

### Thresholds To Enter Phase 3

**Infection Rate**
- Maximum social-distancing
- Continued decline in daily cases
- < 3% positive of tests conducted (daily)
- Current estimate of < 10 cases per 100,000 population per day
- All symptomatic people, all asymptomatic high-risk individuals or contacts can access testing
- Tests are readily available for all essential personnel
- Majority of test results are returned within 24 hours
- Increasing number of tests per day, nearing sufficiency

### Thresholds To Enter Phase 4

**Infection Rate**
- Maximum social-distancing
- < 1% positive of tests conducted (daily)
- Current estimate of < 1 case per 100,000 population per day
- All symptomatic people, all asymptomatic high-risk individuals or contacts, and anyone who requests a test/any physician who orders a test can access testing
- Tests are readily available for all essential personnel
- Majority of test results are returned within 24 hours
- Sufficient number of tests per day

### Case & Contact Investigations

- Maximum social-distancing
- 75% of close contacts are elicited and located within 48 hours
- At least 30 contact tracers per 100,000, as well as case managers, care resource coordinators, community health workers
- > 60% of new cases from identified contacts

### Healthcare Readiness

- Maximum social-distancing
- At least 15% of existing ICU capacity is available to accommodate a surge in COVID-19 patients without resorting to crisis standards of care
- Sufficient PPE for majority healthcare facilities, at-risk facilities, essential personnel

### Protecting At-Risk Populations

- Maximum social-distancing
- Sufficient testing, quarantine, isolation in long-term care facilities
- % of cases reported from long-term care facilities < 20% over last 28 days
- Local rapid response teams are available to respond to outbreak hotspots within 24 hours with sufficient PPE

### Local rapid response teams are available to respond to outbreak hotspots within 24 hours with sufficient PPE

**Thresholds To Enter Phase 1**

- Local rapid response teams are available to respond to outbreak hotspots within 24 hours with sufficient PPE

**Thresholds To Enter Phase 2**

- Local rapid response teams are available to respond to outbreak hotspots within 24 hours with sufficient PPE

**Thresholds To Enter Phase 3**

- Local rapid response teams are available to respond to outbreak hotspots within 24 hours with sufficient PPE

**Thresholds To Enter Phase 4**

- Local rapid response teams are available to respond to outbreak hotspots within 24 hours with sufficient PPE
